Executive Biography

Frontier Solutions Inc.

Terry Rowsell, President

Terry Rowsell is the Founder and President of Frontier Solutions Inc., a Calgary-based firm specializing in managed IT services for small to medium-sized businesses.

A native of Newfoundland, he received a degree in computer systems technology from the DeVry Institute of Technology in Ontario with Electronics Engineering Technology Diploma.

After moving west to Alberta, he founded FSI in 1995, and has led the company as its President since its inception. Prior to developing Frontier Solutions, Terry was a Systems Engineer with SHL Technical Services, also in Calgary.

A parent of four boys, he holds a black belt in Muay Thai. Active in the Calgary community, he has been involved with and provided support for Alberta Children's Hospital, Feed the Hungry, Lifeline Malawi, Plan Canada, Sonshine Community Services, Syrian Refugee, Telecare and World Vision programs.

Organizational Profile

Frontier Solutions Inc.

Frontier Solutions Inc. (FSI) is a Calgary, Alberta- based information technology (IT) firm specializing in managed IT services for small to medium-sized businesses in the Calgary area.

FSI was established in 1995 by **President Terry Rowsell**, who leads a team of 12 specialists located across Calgary.

The firm provides IT strategy, support, data back-up, disaster recovery and cloud services for small businesses with 10-200 employees.

FSI's outsourcing services are designed to optimize performance and productivity of IT environments through an online customer portal, which can be accessed from anywhere.

The firm is focused on delivering prompt IT services, with a guaranteed response time of within an hour for typical requests, and within 15 minutes for emergencies. "The FSI Promise" is to deliver "5 star" services built on strong client relationships, including a 90 day guarantee.

Among its numerous specialized services, FSI provides a multi-layered security solution via a complimentary security audit for prospective clients, featuring a report detailing vulnerabilities and recommended enhancements.
